

Reclaiming the land for  
future generations is

# our job

Bart Arrington, Senior Manager of Mine Permitting  
DeSoto and Manatee Counties

As a professional engineer and long-time Arcadia resident, I'm dedicated to growing a stronger DeSoto County. At Mosaic, that means thoughtfully planning our future phosphate operations while educating local residents about what we do. I also work with a dedicated team of scientists, engineers and environmental specialists to carefully plan for post-mined land uses. Every acre is reclaimed for productive uses like wildlife habitats, parks and agriculture. For me, planning for future generations is more than a job. It's about leaving a legacy we can be proud of.

We help the world grow the food it needs.
