

Sharing knowledge
about the environment is

our
job

Eric Michel, Ecologist & Mosaic Coastal
Education Center Docent
Florida phosphate operations

It's not enough to protect our environment today. At Mosaic, we understand the importance of teaching what we've learned to future generations. As an ecologist for our phosphate operations and a docent at the Mosaic Coastal Education Center, I am able to share knowledge about water, wildlife and natural habitats with local students. By encouraging respect for the environment, we help ensure long-term stewardship of the natural resources Mosaic works so hard to safeguard. For me, instilling a love of nature is more than a job. It's about creating a legacy we can be proud of.

We help the world grow the food it needs.
