

Conserving and
recycling water is

our job

Lian Blackwelder, Engineer
Florida phosphate operations

Safeguarding local water sources is an important part of what we do at Mosaic. As an engineer here in Florida, I help ensure Mosaic reuses and recycles approximately 90 percent of the water at its local facilities. Over the past 20 years, we've seen our phosphate operations reduce groundwater use by more than half. But we're not done yet. Every day, we explore new ways to conserve natural resources and reduce our water usage even further.

We help the world grow the food it needs.
