

DYNA-K[®] White

Potassium Chloride for Animal and Poultry Feed

DYNA-K *White* is a feed grade potassium chloride. It is a source of highly available potassium (K) and chloride (Cl) that will help meet animal and poultry requirements for these essential nutrients.

Typical Chemical Analysis*

%

Potassium Chloride, (KCl)	98.6
Potassium	51.7
Chlorine	46.9

Trace mineral profile is available upon request.

Typical Physical Characteristics

Bulk Density	70-75 lbs/ft ³ (1121-1201 kg/m ³)
Water Solubility	99.5-99.9%; 33g/100ml at 68°F (20°C)
Angle of Repose (degrees)	23

Typical Sieve Analysis: (U.S.)

%

Passing 12 Mesh	99.0
Passing 16 Mesh	70.5
Passing 40 Mesh	7.5

Typical Sieve Analysis: (Tyler)

%

Passing 10 Mesh	99.0
Passing 14 Mesh	70.5
Passing 35 Mesh	7.5

Benefits

- DYNA-K *White* is a rich source of potassium, a dietary essential for animal and poultry.
- DYNA-K *White* supplies potassium in readily available chloride form.
- DYNA-K *White* provides vital potassium which is essential for maximum activity of the rumen microbes.
- DYNA-K *White* furnishes the supplemental potassium needed in formulas where forages and oilmeals are replaced with more economical ingredients that may be low in potassium.

Feed Label Information

When adding DYNA-K *White* to feeds, "potassium chloride" should appear on the feed label. Potassium chloride is an ingredient listed as "Generally Recognized as Safe" (GRAS) by the Food and Drug Administration.

Product Analyses are typical as tested on a composite sample. Grab samples or individual shipment analyses may vary from typical values. Handling and transportation may affect analysis of the delivered product.
