

Powdered Monoammonium Phosphate (PMAP) 10-50-0

TYPICAL ANALYSIS

Chemical Analyses	Typical
-------------------	---------

Nitrogen (Total)	10%
Phosphate as P ₂ O ₅	
- Available (Dry Basis)	50%
- Available (As Is)	49%
- Water Soluble	44%
Crude Moisture as H ₂ O	(0.5% – 1.5%)

Particle Size Distribution	Cumulative %
----------------------------	--------------

Tyler Mesh	Size	Typical
+20	0.84mm	3%
+65	0.21mm	49%
+100	150µm	73%

Physical Properties	(Range)
---------------------	---------

Bulk Density (Loose)	(820 – 850 kg/m ³) or (50 – 52 lbs/ft ³)
Bulk Density (Packed)	(910 – 940 kg/m ³) or (56 – 58 lbs/ft ³)

Product analyses are typical as tested at shipment. **This is not a guarantee for any particular shipment.**
Handling and transportation may affect the analysis of the delivered product
